

PPRRO FORCE[®]
PROFESSIONAL TOOLS

AUTOMOTIVE TOOL SETS & HAND TOOLS

BUILT IN OUR OWN PLANT.

Sockets, wrenches, ratchet and torque wrenches — and the complete light- and heavy-duty sets built from them. Manufactured in Yuyao, Zhejiang since 2007, and available on full ODM terms.

◆ SINCE 2007 ◆ 4,410 M² PLANT ◆ 4 PRODUCTION LINES ◆ 13 MACHINE TYPES

Manufactured by Yuyao Yide Hardware Tools Manufacturer · Exported by NINGBO SOLBEX HARDWARE CO., LTD. · sales@pprroforce.com

2026

COMPANY PROFILE

A TOOL-SET MANUFACTURER, NOT A TRADING COMPANY

PPRROFORCE is the export brand of **NINGBO SOLBEX HARDWARE CO., LTD.** Our products are manufactured in our own plant in Yuyao, Zhejiang – a town built on hardware and tooling, and a plant that has been making tool sets since 2007.

We focus on one thing: automotive tool sets. Sockets, wrenches, ratchet and torque wrenches, and the sets assembled from them. The plant runs 4 production lines and 13 core machine types – including CNC machining centres, cold-heading machines, automatic lathes, presses, marking machines and centreless grinders – staffed by a team of 80+ across sales, design, new-media and quality.

Every run passes three inspection gates: incoming material, in-process, and finished goods, with batch traceability retained. Material and colour are adjustable, samples are produced for your sign-off before any bulk order, and packing is built around your logistics channel. Around 40 new models are released each year.

WHAT WE STAND BEHIND

We manufacture in-house, so we do not pass a claim down a supply chain. If something is wrong with your order, it comes back to the people who made it.

01 ONE-YEAR WARRANTY The range carries a one-year warranty from the invoice date, covering manufacturing defects. Warranty items are replaced rather than repaired where a replacement is faster for you.	02 REPAIR SUPPORT Electric and pneumatic items with a quality issue are supported for repair. Contact us with the model and batch record and we will confirm the route within 5 hours.	03 THREE-GATE QUALITY SYSTEM Incoming material inspection, in-process checks and finished-goods inspection on every run – with batch traceability, so bulk can always be compared against the approved sample.
04 SHORT SHIPMENT Where a logistic short-shipment is confirmed against the packing list, the missing items are re-sent at our cost.	05 QUALITY COMPLAINTS If delivered goods do not meet the sample you approved, we re-supply the affected quantity. Send the batch reference and photographs and we will respond within 5 hours.	06 CUSTOMIZATION STAYS OPEN Full customization, sample-based, drawing-based and minor modification. Material, colour and packing specification are all adjustable – in-house, under the same inspection.
